## **DETAILED ACTION**

### ***Response to Amendment***

The claim objections and the claim rejections under 35 USC 112 except for the rejection of claim 12 as described in paper no. 2 have been withdrawn in view of the amendment filed on February 2, 2004. Also, the rejection of claims 7-12 under 35 USC 103 as described in paper no. 2 has been withdrawn in view of the amendment. The Kriegel reference does not disclose a process without a dewatering step. New rejections follow.

### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it lists only one provisional application. It appears as if it should also list provisional application 60/171915.

### ***Specification***

The disclosure is objected to because of the following informalities: The disclosure lacks a reference to the provisional application. This reference must be included on page 1 of the specification.

Appropriate correction is required.

***Claim Objections***

Claims 7 and 14 are objected to because of the following informalities: Claim 7 is objected to because the word "form" in step (b) should be "from". Claim 14 is objected to because the word "of" in the last line of the claim is unnecessary. Appropriate correction is required.

Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim, or amend the claim to place the claim in proper dependent form, or rewrite the claim in independent form.

Claim 8 is objected to because it does not further limit claim 7. Claim 7 already contains the microwave heating limitation.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-12 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is indefinite because the expression "the demulsified oil" lacks proper antecedent basis in claim 7.

Claim 22 is indefinite because it depends on canceled claim 21. Therefore, the scope of claim 22 cannot be ascertained.

Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is the required heating step. A heating step is required in the process but claims 7-12 do not contain a heating step if the water content of the used oil is 4% or less. The examiner recommends that the limitations of claim 23 be incorporated into claim 7 so that the required heating step is present for all used oil streams and not just for streams that have greater than 4% water.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 7-12 and 23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had possession of the claimed invention.

It appears as if the limitations that the process is performed without a dewatering step (claim 7), that the used oil is heated by microwave when the used oil stream has greater than 4% water (claim 7), and that the used oil is heated by conventional means when the used oil stream has not greater than 4% water (claim 23) were not described in the specification as filed. One having ordinary skill in the art would be required to perform undue experimentation to determine the used oil characteristics that would benefit from conventional or microwave heating.

Additionally, the negative limitation (i.e, without a dewatering step) does not have basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kriegel et al. (4,522,707).

The Kriegel reference discloses a burnable used oil fuel product. See col. 2, line 49 through col. 3, line 12. Since claims 1-5 are drawn to a composition, the process steps in claims 1-5 do not distinguish the claimed product from that disclosed in Kriegel.

***Allowable Subject Matter***

Claims 13-20 are allowed.

Claim 22 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:  
The prior art of record does not disclose or suggest an apparatus as claimed that contains a microwave heating section.

*Conclusion*

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
